To whom it may concern

Dear Sirs,

Re: New York City Department of Health Approval HDLD #04-02-2010

The above approval #04-02-2010 is for the Securistyle (an ASSA ABLOY Group brand) Detachable Restrictor Model Series SDR4, SDR6, SDR8, SDR10 and Release Key.

It is important to clarify that this approval does not cover a window system and that Securistyle does not produce a window system. The HDLD number provided to Securistyle for these products may be used by window fabricators who are incorporating the SDR Detachable Restrictor in their window system as it is applicable to the product – not the window system.

Should the window system require New York City Department of Health approval, then it is the responsibility of the fabricator to ensure they have achieved compliance.

Yours sincerely

For and on behalf of Yale Door and Windows Solutions

Grant Stratford
